

## Clean, Affordable, Reliable Energy

Missouri's clean energy sector is poised to see significant growth in the coming years. As renewable energy costs decrease, the potential for growth rises. Successes in the state's wind, solar and storage sectors allow for hope for the future. Updating transmission infrastructure will enable reliable and affordable renewable energy to be provided throughout the state and the Midwest. Additionally, renewable energy generation is the second-largest clean energy employer in Missouri.

### Connecting Midwest Clean Energy Reliably & Affordably

Today, throughout the Midwest, clean energy contributes to keeping the lights on 24/7/365. Tomorrow, a modernized grid will connect clean energy economies all over the Midwest. Homegrown clean energy will be the backbone of reliable electricity when and where it is needed. Transmission is the key to unlocking this growth and resiliency for generations to come.

## Delivering Our Midwest Renewable Energy

*Clean Grid Alliance (CGA) is a nonprofit organization whose 50+ members include wind, solar and storage developers, manufacturers, nonprofit environmental, public interest and clean energy advocacy organizations, farmer organizations, and other businesses that support renewable energy. CGA has a long history of success in expanding market opportunities through technical expertise in transmission and regulatory processes, policy work, and public education and outreach to build support.*
