Clean, Affordable, Reliable Energy

Illinois’ landmark legislation, the Climate & Equitable Jobs Act of 2021, charts a path to 100% clean energy with a focus on workforce equity, electricity affordability & grid reliability. Already third in the nation for installed wind capacity, and with a growing solar sector and battery storage on the horizon, Illinois will be a Midwest clean energy power-house for years to come.

Connecting Midwest Clean Energy Reliably & Affordably

Today, throughout the Midwest, clean energy contributes to keeping the lights on 24/7/365. Tomorrow, a modernized grid will connect clean energy economies all over the Midwest. Homegrown clean energy will be the backbone of reliable electricity when and where it is needed. Transmission is the key to unlocking this growth and resiliency for generations to come.

A modern grid grows reliable Midwest clean energy.
