

# RENEWABLE ENERGY CONTRIBUTES \$82 BILLION TO MIDWEST ECONOMY

## Investments In Clean Energy

The growing demand for clean energy means economic benefits for communities and states that host wind and solar developments.

As of February 2022, the United States has invested \$369 Billion in wind, solar and energy storage projects. The Midwest has received 22% or \$82 Billion of those capital investments. (1) Globally, investment in clean energy and energy efficiency was over \$750 Billion in 2021. (2)
